■ = Functional   - = Not yet supported   0 = Unconfirmed   1 = Simulated   2 = QSIG   3 = No TLS/SRTP Support   4 = SIP-Client   5 = with anynode

Facsimile (Softfax / T.38) requires UDP/RTP reliability through IP networks.   No responsibility is taken for the correctness of this information.

This compilation exclusively contains devices tested by us - hence interoperability of XCAPI with devices not listed here is still possible.

■ = Functional   - = Not yet supported   [o] = Unconfirmed   [1] = Simulated   [2] = QSIG   [3] = No TLS/SRTP Support   [4] = SIP-Client   [5] = with anynode

Facsimile (Softfax / T.38) requires UDP/RTP reliability through IP networks.   No responsibility is taken for the correctness of this information.

This compilation exclusively contains devices tested by us - hence interoperability of XCAPI with devices not listed here is still possible.
